
The Smiling Times

March 2007 *Bramalea Dentistry* Making terrific & healthy smiles

Welcome Dr. Oh!

Dr. Mel Perlmutter and the staff of Bramalea Dentistry were pleased to welcome Dr. Aaron Oh as an associate on October 1, 2006. Dr. Oh has endeared himself to our staff and patients by demonstrating a sincere interest in doing quality work and acting in the best interest of our patients. Working on Wednesdays, Fridays, and Saturdays, he offers added convenience for our patients and allows Dr. Perlmutter to reserve Wednesdays and Fridays for special cases. Both Dr. Perlmutter and Dr. Oh are pleased to accept new patients.

Bramalea Dentistry

Did you know?

Which restorations are the strongest and least likely to break?

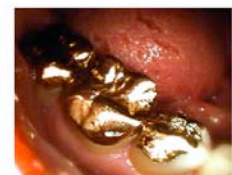

If you guessed Cast Gold, you are correct!

Dr. Perlmutter says "I have never seen this break. The cost is LESS than porcelain due to reduced labour. In my mouth, these restorations are not easily seen."

This is Dr. Perlmutter's mouth. Treatment was done by Dr. Oh (and Talisman Dental Laboratory).

Teeth Prepared

Cast Gold

This cast gold restoration is still good after being made in 1969 for dental student Mel Perlmutter. The tooth in front of it has a porcelain-on-metal crown that has been in place for more than 20 years.

"PLEASE COMPLAIN"

We want to improve. Your constructive suggestions are welcome.

Is there ONE thing that we could do better?

Please phone, write, or contact us by email at bramleadentistry@rogers.com

By The Way

If you think we're great, we would greatly appreciate hearing from you as well.

Thank you for your patronage.

Referral of your friends and relatives is greatly appreciated. Pass this newsletter to them.
